PROFESSIONAL SUMMARY

Backend Developer with 4 years of experience delivering reliable server-side solutions, including 1 year focused on Java and Spring Boot within production microservices environments. Builds RESTful APIs applying SOLID principles and Clean Architecture to create maintainable, testable systems, with additional professional experience in PHP and ASP.NET. Contributed to production projects at Globant, automating API contract validation and streamlining dependency management, and implemented CI/CD pipelines with GitHub Actions for faster, safer deployments. Comfortable working with Docker for containerized development and participating in Scrum ceremonies (daily standups, sprint planning) within agile teams. Collaborative team player with front-end exposure (HTML, CSS, JavaScript) and hands-on experience deploying cloudbased applications.

SKILLS

- Java
- Spring Boot
- PHP
- ASP.NET
- Feign Client
- RESTful APIs
- OpenAPI / Swagger
- Microservices
- Docker
- Agile / Scrum
- Clean Architecture
- SOLID Principles
- Maven (BOM, POM structuring)
- Git
- Postman
- SoapUI
- SQL

EMPLOYMENT HISTORY

Dec 2025 — Feb 2026

Software Developer, Globant S.A., Banamex — Cali

- Developed a custom Maven Plugin using OpenAPI/Swagger to validate API contracts (JSON/YAML), improving consistency and enforcing contract-first practices.
- Automated code and configuration generation using Apache Velocity templates, reducing manual setup effort.
- Established Third-Party Library standards by documenting and applying BOM strategies within the POM structure to resolve versioning conflicts and streamline dependency management.
- Worked within a Scrum team, participating in daily standups and sprint planning as part of the agile development cycle.

Sept 2025 — Nov 2025

Software Developer, Globant S.A., Banamex — Cali

- Developed a custom Maven Plugin using OpenAPI/Swagger to validate API contracts (JSON/YAML), improving consistency and enforcing contract-first practices.
- Automated code and configuration generation using Apache Velocity templates, reducing manual setup effort.
- Established Third-Party Library standards by documenting and applying BOM strategies within the POM structure to resolve versioning conflicts and streamline dependency management.

Jul 2022 — Jul 2024

Software Developer, Centro de Capacitación y Educación Dirigida (CCED) — Cali

- Designed and developed the institutional website, providing structured information for students and businesses.
- Built a student management system handling payments, grades, and attendance tracking.
- Enabled role-based features for professors and students to manage and visualize academic data.

Jul 2020 — Jul 2021

Software Developer, Omnicon S.A. — Cali

- Developed a contract management application allowing collaborators to generate, visualize historical, and download contracts efficiently.
- Created a human talent management application to centralize collaborator information, register potential new talents, and facilitate onboarding processes.
- Built an internal ideas platform enabling collaborators to submit improvement suggestions, track idea statuses, and earn redeemable in-app rewards.
- Designed an internal application management system for tracking new app requirements, facilitating reviews, and managing feedback including screenshots and comments.

EDUCATION

Jan 2020 — Jan 2021

Software Developer, Servicio Nacional de Aprendizaje (SENA), Cali, Colombia

Oct 2023 — Dec 2025

Software Developer, Servicio Nacional de Aprendizaje (SENA), Cali, Colombia

Jan 2022 — Dec 2022

Technical Degree in Systems, Centro de Capacitación y Educación Dirigida (CCED), Cali, Colombia
